The Canadian Urban Environmental Health Research Consortium

Canue Metadata - Neighborhood Gentrification, Urban Interventions, and Equity

2026-11-06

DATA SET INFORMATION

Dataset Code: GEN_A_YY

Description:

The Gentrification, Urban Interventions, and Equity (GENUINE) Tool is a map-based gentrification tool for Canadian metro areas. The primary envisioned use for GENUINE is policy evaluation and research studies that assess the potential health and societal impacts of gentrification processes. Accompanying maps for each Census Metropolitan Area (CMA) are published online. The mapping platform simultaneously shows four gentrification measures for each CMA, facilitating comparisons between measures. We developed GENUINE to integrate gentrification measures relevant to the Canadian context, adapting four published gentrification measures that have been applied to U.S. and Canadian census data. We computed these measures for all 36 Canadian CMAs to illustrate where gentrification occurred between 2006 and 2016. The GENUINE data were developed by Caislin Firth, Benoit Thierry, Daniel Fuller, Meghan Winters, and Yan Kestens, as part of the gentrification workgroup of INTErventions, Research, and Action in Cities Team with funding from the Canadian Institutes of Health Research. GENUINE measures have been developed using 2006 and 2016 census tract areas to identify areas that have gentrified by 2016. Please refer to the Technical Document for methods used to calculate each gentrification measure. GENUINE data were linked to all 2016 six-digit DMTI spatial single link postal code locations in Canada by CANUE staff. NOTE: all postal codes within a Census Tract are assigned the same value. Summing data is not appropriate. Original census tract data can be downloaded directly from links provided in the technical documentation.

Keywords: neighbourhood environments|gentrification|housing|income|urban change

Place Keywords: Canada|national

GEOSPATIAL REFERENCE

Upper Left Corner: 65.14N , -141.02W

Lower Right Corner: 41.68N , -52.62W

Coordinate System: GCS_WGS84 - EPSG:4326

Geometry Type: POINT - Units: Decimal Degree

Geometry Data Source: DMTI Spatial Inc. (postal codes)

QUALITY ASSESSMENT

QA/QC Procedures:

CANUE did not assess the quality of the Gentrification, Urban Interventions, and Equity data. Users should review the supporting documentation and any recommended citations.

Geographic Coordinate Positional Accuracy:

These metrics are linked to the corresponding annual postal codes files for mapping and analysis purposes. Refer to the postal code metadata file in Supporting Documentation for more information.

Vertical Positional Accuracy: N/A

Attribute Accuracy: N/A

Data Validity: NoData = -9999 (for numeric fields) - NoData=null (for category fields) - Data insufficient to calculate value = -1111

Associated Files: N/A

Data Comment:

Please refer to Technical Guide for definitions of the four gentrification measures.

DATA SOURCE

Data Source
Gentrification workgroup of INTErvestions, Research, and Action in Cities Team (http://teaminteract.ca/gentrification/); Statistics Canada (census tract area boundary file). See Supporting Documentation.

Spatial Resolution: Census Tracts

Data Preparation Date: 2020-04-01

Beginning Date: 2016

End Date: 2016

Sampling Frequency of Data: 2016 Only

Years Available:
2016

MAINTENANCE

Description: N/A

File Type: Comma separated values(.csv)

File Size: 56 MB

Number of Data Files: 1

DATA USE CONDITIONS

The Data User is REQUIRED:
(i) to acknowledge data sources listed under Acknowledgement(s)
(ii) cite the publication(s) listed under Recommended Citation(s) as the providers and source of these data when using them in support of research, analysis, operations, policy decision or any other undertaking including publication
(iii) complete and sign the CANUE Data Use and Sharing Agreement (available at http://canue.ca/data/), in which the name and signature of the researcher/analyst who takes responsibility for ensuring all conditions are met.

Data Sharing Restrictions:
These data files are provided solely for the purposes stated in the CANUE Data Sharing and Use Agreement and should not be re-distributed for any reason.

Include the following references in any publications resulting from the use of these data:

VARIABLES

GENYY_01 - Census Tract unique ID

Census Tract unique ID

GENYY_02 - Census Metropolitan Area unique ID

Census Metropolitan Area unique ID

GENYY_03 - Total population in census tract in 2016

Total population in census tract in 2016

GENYY_04 - Region name

Region name

GENYY_05 - Gentrifiable census tract according to Freeman in 2006

Gentrifiable census tract according to Freeman in 2006 (1=gentrifiable, 0 otherwise)

GENYY_06 - Gentrified census tract according to Freeman in 2016

Gentrified census tract according to Freeman in 2016 (1=gentrified, 0 otherwise)

GENYY_07 - Gentrifiable census tract according to Ding in 2006

Gentrifiable census tract according to Ding in 2006 (1=gentrifiable, 0 otherwise)

GENYY_08 - Gentrified census tract according to Ding in 2016

Gentrified census tract according to Ding in 2016 (1=gentrified, 0 otherwise)

GENYY_09 - Pace of gentrification in the census tract

Pace of gentrification in the census tract (3 categories: intense, moderate, weak)

GENYY_10 - Gentrifiable census tract according to Grube-Cavers in 2006

Gentrifiable census tract according to Grube-Cavers in 2006 (1=gentrifiable, 0 otherwise)

GENYY_11 - Gentrified census tract according to Grube-Cavers in 2016

Gentrified census tract according to Grube-Cavers in 2016 (1=gentrified, 0 otherwise)

GENYY_12 - Gentrifiable census tract according to Steinmetz-Wood in 2006

Gentrifiable census tract according to Steinmetz-Wood in 2006 (1=gentrifiable, 0 otherwise)

GENYY_13 - Gentrified census tract according to Steinmetz-Wood in 2016

Gentrified census tract according to Steinmetz-Wood in 2016 (1=gentrified, 0 otherwise)
